REPORT
OF
THE COMMITTEE OF VISITORS
OF THE
SURREY LUNATIC ASYLUM,
FOR THE YEAR, 1855,
PRESENTED AT THE
COURT OF QUARTER SESSIONS,
HELD AT REIGATE, on the 8th Day of APRIL, 1856.

THE Committee of Visitors, in presenting their Fourteenth Annual Report, have again to express their regret that the price of provisions and other articles of general consumption at the Asylum, remains much too high to admit of any immediate reduction in the weekly charge for the maintenance of patients.

The number of patients in the Asylum on the 1st January, 1855, was 921; and, during the year, 309 other patients were admitted, making a total of 1230, of whom, 71 males and 77 females were discharged cured; 13 males

and 14 females were discharged uncured ; and 65 males and 53 females died : leaving in the Asylum, at the close of the year, 937 patients ; of whom 420 were males and 517 females.

Of the patients discharged cured, 53 were presented with donations from the Benevolent Fund, varying from ten to forty shillings each.

Three deaths occurred during the year under circumstances requiring Coroners' Inquests. The particulars of each of these cases are stated in the annexed Reports of the Medical Officers.

The average number of patients attending Chapel was 414 ; and an average of 589 was daily employed in various trades—in labour on the farm or in the garden ; at needlework ; or in the various domestic occupations of the Institution.

It is very satisfactory to report, as on several previous occasions, that, during the year, mechanical restraint has not been resorted to in any instance ; and the cases of seclusion have been very few, and for very short periods.

During the year much additional furniture has been provided. The libraries, for the use of the patients, have been greatly enlarged, and many hundreds of interesting and valuable prints have been hung up in the various wards, by all which the comfort and amusement of the patients, and the general cheerfulness of the Establishment have been greatly extended.

With respect to the prints, it is right to state that many of them have been received as presents, for which the Committee have expressed their gratitude. The rest were purchased on terms so low as to be quite nominal.

During the year SIR ALEXANDER MORISON tendered his resignation, having become, from age, incapable of performing the duties of his office to his own entire satisfaction. He held the appointment of Visiting Physician in the Establishment from its opening, and he materially assisted, by his advice, the Committee appointed to superintend the erection of the Building, previous to its commencement, and during the progress of the work.

In consideration of his lengthened and valuable services, and the circumstances under which his resignation was tendered, the Committee have granted him a superannuation allowance of £140 per annum, under the statute for the “Provision and Regulation of Lunatic Asylums for Counties and Boroughs.”

No other Visiting Physician has been elected in his place, the extensive medical knowledge and great experience of the two Resident Medical Officers of the Asylum, rendering unnecessary the renewal of the appointment. The Committee, however, in consequence of the increased responsibility which now attaches to these Officers, and generally in consequence of the great increase in the number of patients, have considered this a fitting opportunity to revise their salaries, and to substitute an annual money payment in place of numerous allowances from the stores of the Asylum. After a careful consideration of the subject, the Committee have increased the salary of each £100 per annum, but they will no longer be supplied with linen, china, glass, turnery, or other such articles.

A similar change has been made in the manner of paying the Steward, whose salary has been increased £70 per annum.

The Committee adverted at considerable length, in their last Annual Report, to the circumstance of the Asylum being frequently unequal to the requirements of the County, and of their intention to attempt to remedy the defect by discharging all those patients, who, being harmless and inoffensive, it was considered might be properly taken care of in their respective Union Houses.

The plan has been tried, and has not been successful. Patients, who, under the liberal and gentle treatment they experience in the Asylum, are quiet and tractable, are not necessarily so under the stricter regulations of a Workhouse; indeed, so far as the experiment has been tried, the reverse has been found to be the case; most of the patients so discharged having been shortly afterwards returned to the Asylum, or placed in some other Institution for the Insane, in consequence of their having

become, with the inmates of the Workhouse, “*a mutual annoyance to each other.*” Any arrangement short of an entire separation from the other inmates of the Workhouse, will be found to be inefficient.

The Asylum is probably capable of a little further extension, but the additional number that can be thus accommodated will be very small. The Committee will give their best consideration to the means by which this may be effected, and will report thereon at the Sessions in July next; at the same time they feel they ought not to withhold the expression of their conviction, that the time is rapidly approaching in which it will be incumbent on the Magistrates to make, by the erection of extensive and appropriate Buildings at Wandsworth or elsewhere, adequate provision for such of the Pauper Insane of the County as cannot be accommodated in the present Establishment.

The Committee append a letter they have received from the Guardians of Lambeth on this subject; they append also, the usual

Statements of Accounts and Tables, and they feel assured the annexed Reports of the Chaplain and Resident Medical Officers of the Asylum will be read with much interest.

HENRY KEMBLE, *Chairman.*

J. E. JOHNSON,
JOHN JEFFERY,
HENRY GOSSE,
THOMAS PUCKLE,
THOMAS SYDENHAM CLARKE,
AMBROSE BOYSON,
CHARLES FRANCIS.

TO THE VISITING JUSTICES OF THE SURREY COUNTY
LUNATIC ASYLUM.

GENTLEMEN,

The Board of Guardians for the Parish of Saint Mary, Lambeth, desire to bring under your consideration the position in which they are placed with regard to the care and treatment of Pauper Lunatics belonging to that Parish.

The Board, at their recent visit to the Asylum, were informed that the part thereof allotted to females was quite full, and that no more could be received.

The private Asylums are also full, and the Board, therefore, are left to the alternative of retaining patients in the Workhouse, whose peculiar state renders it necessary that they should receive that care and attention contemplated by the Establishment of the County Asylum.

Under these circumstances, the Board beg to solicit your early and serious attention to the subject, with a view to provide for the reception of all cases arising in the County, either by extending the accommodation at the present, or the erection of an additional Asylum.

(Signed by Order of the Board,)

W. T. LOGAN, *Clerk.*

Lambeth Workhouse,

March 13th, 1856.

TO THE COMMITTEE OF VISITORS.

Surrey County Asylum,
December 29, 1855.

GENTLEMEN,

I beg leave to submit to you the usual Annual Report of the condition and general management of the male department of the Asylum during the past year.

The number of patients left in the Asylum on the 31st December, 1854, was 396

The admissions during the year have been..... 173
making a total of 569 under care and treatment during the twelve months.

The discharges and deaths have been as follows:—

Recovered	71
Uncured	13
Died	64
	<hr/>
Leaving in the Asylum	421

A Coroner's Inquest was held upon one case of sudden death, and the verdict of the Jury was "Natural death—epileptic fits."

The deaths have been rather greater this year than usual, but this mortality has been increased by several cases having been admitted in a sinking and hopeless condition; on the other hand the recoveries have been more numerous than in previous years.

The deaths have resulted from the following causes :—

General Paralysis	23
Apoplexy	4
Epilepsy	6
Pulmonary Consumption	8
Diarrhœa	2
Disease of heart	1
Natural decay	6
Exhaustion and other causes	14

The usual statistical Tables will be found in the Appendix. The general health of the patients has been favourable throughout the year, and they have been free from any epidemic disorders.

In reference to the employment of the patients I am enabled to speak in the most satisfactory terms of the steadiness, industry, and even pleasure shown by them in their work; and there seems every reason to believe that a systematic and regular employment of the patients, by diminishing their mental excitability, is not the least efficacious of the remedial influences at work in our Asylum. They have been employed in various trades—such as shoemaking, tailoring, carpentry, mat-making, &c., the principal employment of the patients, however, is the cultivation of the garden and farm: the former is being gradually trenched, and is in a high state of cultivation, producing most abundant crops; and I think I am warranted in saying, that the result of the labour of the male patients has been highly beneficial to those employed, as well as been profitable to the Establishment. I could point out several very striking instances where some of our incurable patients, who were formerly of vicious and destructive habits, have, by a proper application of labour, acquired habits of industry and good conduct.

The amusement and recreation of the patients have also been promoted as far as practicable. The Band which has been formed in the Asylum is becoming more proficient, and proves a great source of pleasure and innocent amusement; this, added to various simple games and light periodical literature introduced amongst them, tend very much to relieve their minds from the monotony of an asylum life.

Several convenient and neat articles of furniture—such as chairs, settees, and tables have also been introduced into the galleries and day-rooms; these, as well as numerous prints with which the walls have been hung, contribute much to the cheerfulness, comfort, and amusement of the patients.

With regard to the conduct of the Officers and Servants, I have to report that, with some few exceptions, all have fulfilled their duties in a highly creditable and praiseworthy manner.

In conclusion, I beg to state that every effort is being made to improve the condition and management of the Asylum: and permit me to return you my sincere and most grateful thanks for the uniform support and consideration afforded to me in the onerous and responsible task of conducting an important department of your Institution.

I have the honour to remain,

Gentlemen,

Your obedient and obliged Servant,

CHARLES SNAPE.

Surrey County Asylum,
December 29th, 1855.

TO THE CHAIRMAN AND COMMITTEE OF VISITORS.

GENTLEMEN,

On the 31st of December, 1854, there were in the Asylum, 525 Female Patients; during the year, 135 have been admitted; 77 have been discharged recovered, 14 have been removed by their friends or respective parishes, and 53 have died, leaving in the Asylum this day, 516 female patients.

The causes of death being as follows:—

Paralysis	13
Apoplexy	1
Epilepsy	7
Pulmonary disease	7
Diarrhœa	1
Erysipelas	2
Disease of Heart	2
Decay of Nature (old age)	9
Exhaustion and various causes	11
	<hr/>
	53
	<hr/>

Coroner's Inquests were held in two cases, in one the verdict being "Natural death from an epileptic fit;" in the other, a case of suicide, "That the deceased did cause her own death, being at the time of unsound mind; and we, the Jury, are of opinion, that although the death has occurred by her own actions, yet to us it is satisfactory that proper attention and care had been used with a view to the prevention of her committing such an act."

It is always unpleasant for a suicide to occur, but having upon an average 50 stated suicidal cases under my care, it is a wonder that so few accomplish their object. In this instance I could detect no other insanity but the constant desire of self-destruction, and during the two years she was an inmate of this Asylum her attempts were innumerable, causing constant anxiety to those whose office it was to have the charge of her.

No less than 21 of the deaths have been the result of paralysis, apoplexy, or epilepsy, diseases concomitant with insanity, nine deaths from decay of nature or old age, leaving but 23 occurring from all other causes, sufficiently evincing the general good health of the Establishment throughout the year.

No mechanical restraint or coercive means of any sort whatever have been used, and temporary seclusion has been needful in five cases only for brief periods, amounting in the whole to 28 hours.

We have vacancies now for about ten female patients; but if only such persons were sent here as require the treatment of an asylum, I believe the present building would be quite adequate for the present and future requirements of the County. I am sorry again to report to you upon how trivial grounds several patients appear to be sent here, especially those who have previously been discharged.

During the past six years I have recommended to be discharged (recovered) 491 female patients; how many of these would, in all probability, have remained hopelessly insane, were it not for the prompt treatment which your Asylum has enabled them to receive.

Your grant of a sum of money for the purchase of more books for the Library, and also for prints to adorn the walls

of the wards, has been much appreciated by the patients; the books have been read constantly, and I have often noticed them standing contemplating the pictures, and they have expressed to me the pleasure they derive from them: and at present not a single one has been injured.

The liberality of Messrs. Graves, Messrs. Colnaghi, and William Smith, Esq., has enabled us to possess some engravings of a very superior character. We have at present about 300 prints; it is few however for the magnitude* of the building, and I trust to be able to report to you further donations.

I have great pleasure in stating that I believe the conduct of the Female Attendants has been most exemplary.

I beg again to offer you my best thanks for your kindness on all occasions, which has always so much contributed to the satisfaction with which I have been enabled to perform my duties.

I have the honor to remain,

Gentlemen,

Your obedient and obliged Servant,

HUGH W. DIAMOND.

* We have as much as one mile in extent alone in the open wards without dormitories, which would be advantageous for the display of pictures.

R E P O R T
OF
THE REV. RICHARD W. GREAVES,
CHAPLAIN
OF THE
SURREY LUNATIC ASYLUM.

TOOTING, JAN. 31, 1856.

GENTLEMEN,

The lapse of another year calls for some remarks from your Chaplain upon that subject, which is, of all others, the most important, viz :—the religious aspect of your noble Institution. The nature of the malady by which the inmates are afflicted renders the idea of general progress in religion almost hopeless. Isolation seems to be the necessary result of mental affliction, and hence religious sympathy is rarely observable. We must look then for results chiefly, if not entirely, to individual cases.

And here I do not feel that there is any ground for discouragement. Whilst your Establishment preserves its general religious character, through the ministrations which are regularly conducted, some of its inmates manifest a very decided appreciation of the truths of the gospel. Sentences of Scripture read and expounded, are frequently retained, and patients have been heard by their attendants to repeat them, even in the article of death. Others make enquiry respecting those things which belong to their eternal peace—whilst, in a few instances, the most lively and intelligent interest is manifested whenever the Word of God is either publicly preached or privately expounded. These facts are sufficient to prove an encouragement to my mind.

Another subject which, though not bearing so directly upon my duties, I should like to advert to, viz: the cheerfulness and happiness which, so far as it is possible, and to a much greater degree than would be generally conceived, pervades your Establishment.

I know not precisely what kind of festivity was introduced at Christmas, but certainly the

ingenuity and taste which were exercised in the simple adornment of some of the wards, deserve high praise, both toward those who directed, and those who executed the pleasing devices. I advert to this fact, because I think that it cannot but prove a source of gratification to all who may look through the pages of the Report, to be assured of the unfailing and judicious kindness which is ever manifested in the Asylum, and which result in great happiness amongst the patients.

I have the honour to be, Gentlemen,

Your very faithful Servant,

RICHARD W. GREAVES.

To the Visiting Justices of the
Surrey County Lunatic Asylum.

TABLES.

[TABLE, No. 1.]

STATEMENT of Receipts and Payments in the year

RECEIPTS.

1855.	£	s.	d.	£	s.	d.
Jan. 1. To Cash Balance at the Bank of England	2,531	4	0			
Ditto in the hands of Clerk and Steward	39	14	10			
	<hr/>			2,570	18	10
Dec. 31. Ditto received from Unions and Parishes for maintenance of Patients, at the weekly charge of 9s.	18,981	6	2			
Ditto ditto from the County Treasurer for maintenance of Vagrant Lunatics, at the above charge	1,707	14	5			
Ditto ditto from Parishes in other Counties, at 14s. per week.....	599	2	8			
	<hr/>			21,288	3	3
*Ditto ditto from County Treasurer for ordinary Repairs	2,433	7	3			
*Ditto ditto for additional Works, (Male side and Farm Premises)	1,311	11	4			
Ditto ditto for Farm Produce	260	16	8			
Ditto ditto for Garden Produce	21	8	9			
Ditto ditto from Union Insurance Office.....	50	8	2			
Ditto ditto from Wandsworth House of Correction ..	9	0	0			
Ditto ditto Miscellaneous Sales—Bones, Rags, &c. ..	23	7	2			
	<hr/>			£27,969	1	5

* These apparent discrepancies arise from the payment of wages during the Michaelmas quarter not being re-paid by the County Treasurer until the commencement of the following year, and for sums due from the County for which a vote from the Quarter Sessions for the payment thereof was obtained at the Epiphany Sessions, 2nd January, 1855.

STEPHEN BRIDGLAND,

Clerk and Steward.

The following observations will explain the medical terms used in *Tables Nos. 12 & 13*.

The phenomena of insanity may be comprehended under three heads, those of Unreasonable Conduct, Incoherent Discourse, and Erroneous Ideas or Delusions. These have been again divided into two classes, one including the symptoms of a deranged, the other those of a weak mind, constituting the Lunacy and Idiocy of legal writers.

Derangement of mind may be either general, affecting the different manifestations of mind, including attention, memory, imagination, judgment, and the affections and propensities; or it may be partial, affecting only some of them. The term Mania is applied to general insanity, and that of Monomania to partial insanity.

Weakness of mind may, in like manner be general, or it may be partial; it may also be congenital, that is, from infancy. It is, when general, termed Idiocy, and the term Imbecility has been applied to slighter degrees of weakness of mind when congenital.

Weakness of mind, however, is not always from birth; it frequently occurs after the full possession of the mental faculties, and then the term Dementia, or Fatuity, is employed to distinguish the state, which is analagous to Idiocy; and the term Incipient Dementia is used to mark the lesser degree of weak mind, analagous to Imbecility, and modified by the previous circumstances of the patient. This last-mentioned state in its various stages is very common in Asylums, where we often find the original character of the mental disorder more or less blended with weakness of memory, and incoherence of ideas. It also usually accompanies palsy and epilepsy, and is frequently the state of mind in old age.

In most cases of Mania the ideas are erroneous. Occasionally the unreasonable conduct of the insane person is not attended with this feature, but appears to be the effect of strong propensities overcoming the power of reason and of will. The term Mania, without Delirium, has been applied to this variety, which is not of frequent occurrence.

ALEXANDER MORISON, M.D.
